

OneSpan Sign

Simple, advanced, and qualified e-signatures. OneSpan Sign has it all.

HIGHLIGHTS

Superior Experience

Bring automation to your e-signature workflows and deliver optimal customer and employee experiences

Global Solution

An enterprise-grade solution that scales across geographies, use cases, and channels and integrates with the apps you use every day

Strengthen Compliance

Vendor-independent audit trails that help you deliver legally binding, admissible, and enforceable e-signatures

Transact Securely

Bank-grade security, strong identity proofing, and support for digital certificates that adhere to global standards (e.g., X.509 PKI)

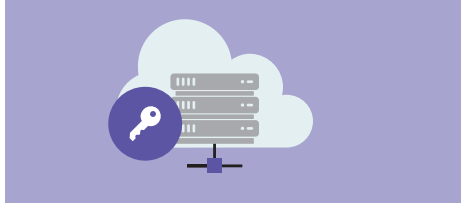

OneSpan Sign keeps you compliant, no matter where you do business. The solution supports the rigorous requirements set forth under the EU's eIDAS Regulation, including the Advanced E-Signature (AES) and Qualified E-Signature (QES). Plus, it provides comprehensive support for working with Trust Service Providers (TSPs) that issue digital certificates and timestamps.

Secure Digital Transactions

With the AES and QES, signatures must be uniquely linked to the signer. The QES is a stricter form of the AES and requires signers to validate their identity using a certificate-based ID issued by a TSP. The authenticity of the digital certificate is backed by the reputation of the TSP issuing it.

OneSpan Sign Supports:

REMOTE DIGITAL CERTIFICATES LOCAL DIGITAL CERTIFICATES

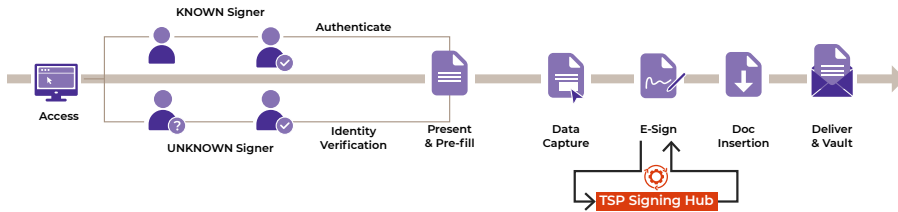

The individual's signing key (digital certificate) is held remotely by a qualified TSP within an HSM on behalf of the individual and leveraged by OneSpan Sign to validate the identity of the certificate holder at the time of signing.

The individual's signing key (digital certificate) is held locally on a secure signature creation device (e.g., smart card, token, etc.) and leveraged by OneSpan Sign to validate the identity of the certificate holder at the time of signing.

How It Works

OneSpan Sign provides a choice of native and third-party identity management services. The solution automatically works with certificate-based IDs issued by TSPs to deliver Qualified E-Signatures through OneSpan Sign. Our TSP partners are on the EU Trusted List, enabling cross-border recognition of electronic signatures.

TSP Partners

About OneSpan

OneSpan helps protect the world from digital fraud by establishing trust in people's identities, the devices they use and the transactions they carry out. We do this by making digital banking accessible, secure, easy and valuable. OneSpan's Trusted Identity platform and security solutions significantly reduce digital transaction fraud and enable regulatory compliance for more than 10,000 customers, including over half of the top 100 global banks. Whether through automating agreements, detecting fraud or securing financial transactions, OneSpan helps reduce costs and accelerate customer acquisition while improving the user experience.
