

DATASTILLI. DIGIPASS GO S

Digipass GO 3

Ultra-portable, strong authentication for ultimate convenience and user acceptability.

HIGHLIGHTS

Cronto Image

Not all security measures require sophisticated procedures with multiple steps and physical entries required to authenticate users. Neither should it pose a large expense. Digipass GO 3 offers a simple and affordable two-factor authentication solution.

User acceptance of security tools is a crucial factor in guaranteeing the success of security solution implementations for secure access to remote applications and networks. An alternative to the risk that static PINs and TAN lists pose, Digipass GO 3 is very affordable, ultra-user friendly, and quick and efficient to rollout to users.

These advantages allow you to close all security gaps in user authentication in a matter of hours. Digipass GO 3 is also able to carry corporate logos, branding and custom colors to suit your business. Digipass GO 3 is the perfect balance between an elegant design, and an unrivaled degree of portability and affordability in an easy to use security device.

Easy to use

"The touch of a button" encapsulates all that busy users could want in a device that their employer requires them to use. Digipass GO 3 is very small, and features a high contrast LCD display and a single button. This combination offers the ultimate in user-friendliness and high security: One push on the button and Digipass GO 3 shows a unique one-time password on its LCD display.

The user then enters this one-time password into their application login screen. Digipass GO 3 can be combined with different platforms, including PCs, telephones, Internet kiosks and mobile phones, making its use practically anywhere at anytime a plus for users and organizations alike.

Easy to deploy

The integration of Digipass GO 3 into existing networks is simple and fast. Any static password or existing TAN (pre-printed lists of TransAction Numbers) numbers can be replaced instantly with the more secure Digipass GO 3 dynamic password.

Once the unit has been programmed (to suit your authentication needs) and is handed over to the user, there is no need to read lengthy manuals or call on the network manager. Its use is obvious and simple, requiring virtually no support or training.

FEATURES		
Weight: 10 g, including battery		
Size: 12,5 x 30 x 60 mm (H x W x L)		
8-character LCD display		
Activated by pushing 1 small button		
3DES and AES encryption algorithms		
On board real time clock		
Encryption can be:		
• Time synchronous		
Time and event synchronous		
Can be combined with a PIN entry on a PC		
Battery: non-replaceable, lifetime expectancy up to 5 years		
Compatible with Digipass and OATH applications		
Compatible with over 50 major application software vendors		
Supports OneSpan's multi OTP technology		

Certification and compliance			
Short storage temperature	-10° C to 50° C; 90% RH non condensing	IEC 60068-2-78 (damp heat) IEC 60068-2-1 (cold)	
Operating temperature	0° C to 45° C; 85% RH non condensing	IEC 60068-2-78 (damp heat) IEC 60068-2-1 (cold)	
Vibration	10 to 75 Hz; 10 m/s2	IEC 60068-2-6	
Drop	1 meter	IEC 60068-2-31	
Emission		EN 55022	
Immunity	4 kV contact discharges 8 kV air discharges 3 V/m from 80 to 1000 MHz	EN 55024	
Compliant with European directives	•CE: 89/336/EEC or 2004/108/EC •RoHS: 2002/95/EC •WEEE: 2002/96/EC		

Unlike other tokens, the user cannot lock Digipass GO 3, as no PIN entry is required. If required, Digipass GO 3 can be reprogrammed for distribution to another user in cases where an employee is promoted, or even leaves the company.

Digipass GO 3 is fully interoperable with all members of Digipass family and works seamlessly together with the OneSpan Authentication Server and over 50 vendor applications to ensure deployment at the lowest total cost of ownership.

Security within everybody's reach

Not all security measures require sophisticated procedures with multiple steps and physical entries required to authenticate users. Neither should it pose a large expense... Digipass GO 3's normal battery lifetime of 5 years and beyond offers a very high return of investment.

Strong authentication using Digipass GO 3 is the simply implemented, affordable solution. Whether in corporate networking or remote access to banking information - users more readily accept simpler devices that guarantee secure access.

What's more, Digipass GO 3 can be:

- · Carried on a key chain
- · Attached to an existing proximity card
- · Worn around the neck, or
- $\boldsymbol{\cdot}$ Simply be carried in a pocket or purse!

When the design is stylish and the user is not confronted with procedures or difficult to use tools, the acceptance battle is won.

About OneSpan

OneSpan, the digital agreements security company, helps organizations accelerate digital transformations by enabling secure, compliant, and refreshingly easy customer agreements and transaction experiences. Organizations requiring high assurance security, including the integrity of end-users and the fidelity of transaction records behind every agreement, choose OneSpan to simplify and secure business processes with their partners and customers. Trusted by global blue-chip enterprises, including more than 60% of the world's largest 100 banks, OneSpan processes millions of digital agreements and billions of transactions in 100+ countries annually.
