

Digipass® FX2

Stop account takeovers, reduce social engineering, and safeguard customer trust with cutting-edge authentication. Designed to tackle advanced threats, Digipass® FX2 offers phishing resistance, passwordless security, and a seamless "what you see is what you sign" (WYSIWYS) experience. By combining FIDO2 protocols with Cronto® technology, Digipass FX2 ensures a frictionless and secure digital journey for banks and their customers.

Revolutionize security with nextgen technology

Digipass FX2 introduces a groundbreaking approach to digital banking security by combining two industry-leading technologies: OneSpan's patented Cronto® cryptogram and FIDO2 protocols. This synergy creates a phishing-resistant, passwordless solution that sets a new standard for transaction security. Digipass FX2 ensures the highest level of assurance, safeguarding users from social engineering, adversaryin-the-middle (AitM), and replay attacks. As a first-of-its-kind solution, it empowers financial institutions to future-proof their security infrastructure while delivering a seamless, user-friendly experience tailored to meet global compliance

Unparalleled phishing-resistance

In the current threat environment, banks of all sizes need more sophisticated methods to protect accounts and transactions from evolving social engineering attacks, unauthorized access, and account takeover attempts. Digipass FX2 redefines phishing resistance

by leveraging Cronto technology's visual cryptogram and FIDO2's robust authentication framework. Unlike conventional methods, it eliminates static passwords and OTPs, drastically reducing vulnerabilities to phishing schemes. Each transaction is dynamically linked and visually confirmed on a secure device display, ensuring no unauthorized changes can occur. By deploying this solution, financial institutions can effectively neutralize threats like AitM attacks, which often rely on stolen credentials, and maintain the authenticity of every user interaction.

Contextual transaction validation

Financial fraud often hinges on subtle tampering with transaction details. With its "What ou See Is What You Sign" (WYSIWYS) capability, Digipass FX2 enables users to visually confirm transaction specifics on a trusted display before approval. This transparency reassures users and prevents adversary-in-the-browser (AiTB) attacks, ensuring every transaction's authenticity. By deploying a solution with the highest level of assurance, organizations ensure that the authenticity and integrity of online transactions are never in doubt.

Highlights

Secure and convenient

- Phishing-Resistant
 Authentication:
 Eliminates passwords and secures authentication via encrypted, secure channels.
- Multi-Protocol Support: Enables FIDO2, OATH, and Cronto® technologies for flexible, compliant security.
- 'What You See Is What You Sign' (WYSIWYS): Transaction details are verified visually on a trusted device, preventing tampering.
- USB, NFC, and Bluetoothenabled to support users' authentication preferences.

Passwordless Authentication for the Ultimate User Experience

Say goodbye to passwords and cumbersome authentication methods. Digipass FX2's passwordless approach combines biometric authentication with an intuitive, trusted display for a seamless user experience. Users can verify and approve transactions with confidence, enhancing trust and transparency. Its multi-channel connectivity via USB, Bluetooth, and NFC allows effortless integration with any device, from smartphones to desktops. Digipass FX2 sets the bar for delivering a user experience that's as secure as it is intuitive.

Cutting-edge security with dynamic linking

Dynamic linking, a core component of Digipass FX2, offers unmatched protection against evolving threats. By securely binding transaction details to their cryptographic authorization, this technology ensures integrity at every stage.

Paired with the unique capabilities of Cronto's cryptogram and FIDO2's secure key storage, Digipass FX2 creates an environment where phishing attempts, AitM attacks, and replay fraud are rendered ineffective. This state-of-the-art solution provides banks with a scalable, zero-footprint approach to secure transactions.

Stay compliant with global financial services regulations

Digipass FX2 is built to exceed the strictest regulatory standards, such as PSD2 and PSD3, while offering unparalleled security and ease of use. By integrating Cronto and FIDO2 technologies, it delivers the highest level of authentication assurance available on the market.

This new technology addresses the unique challenges of financial institutions worldwide, equipping them with a future-proof strategy to combat social engineering fraud and deliver peace of mind to their customers.

Digipass FX2 helps you to stay ahead of the curve to provide your organization and customers with secure financial transactions you can trust and rely on.

Easy to setup

Digipass FX2 is a Bluetooth and NFCenabled hardware device and can be connected to your mobile device or laptop via USB. Installation via PC is straightforward: simply connect the device to the computer via USB. To connect via Bluetooth, you will need to pair your device with the mobile, PC, or platform you wish to connect to.

No additional drivers need to be installed, ensuring a frictionless and intuitive user experience, resulting in a higher user acceptance.

TECHNICAL SPECIFICATIONS			
Size	95.2mm (L) x 58.2mm (W) x 9.9mm (H)		
Weight	47g		
Display	Capacitive touch color display with backlight 2.4-inch display size - IPS - 240 x 320 resolution		
Fingerprint Sensor	Capacitive		
Bluetooth	Bluetooth 5.2 LE (Low Energy)		
NFC	ISO 14443 / card-emulation mode / extended APDU support		
FIDO	Support for FIDO U2F, FIDO2, and passkeys		
FIPS	FIPS 140-3-Level 3		
Battery	Rechargeable - 320 mAh		
Cable	USB-C cable 1 meter (optional)		
Power Supply in Connected Mode	Via USB-C, 4.75 to 5.50 volts		
Language	Multilingual Support		
Tampering	Tamper evident	ISO13491-1	
Dust & Water Resistance	Dust-safe and splashproof		

CERTIFICATION AND COMPLIANCE			
Short-term Storage Temperature	-10°C to 50°C 90% RH non-condensing	IEC60068-2-78 (damp heat) IEC60068-2-1 (cold)	
Operating Temperature	0°C to 45°C 85% RH non-condensing	IEC60068-2-78 (damp heat) IEC60068-2-1 (cold)	
Vibration	10 to 75 Hz 10 m/s ²	IEC60068-2-6	
Drop	1 meter	IEC60068-2-31	
Emission		EN 55032:2015 + A11:2020	
Immunity	4 kV contact discharges 8 kV air discharges 3 V/m from 80 to 1000 MHz	EN 55035:2017 + A11:2020	
Compliant with European Directives	CE: 89/336/EEC or 2004/108/EC RoHS: 2011/65/EU WEEE: 2012/19/EU REACH NO 1907/2006		
Compliant with Federal Communications Commission	FCC ID: 2AH88-FX2B IC: 27700-FX2B		

About OneSpan

OneSpan is a global leader in digital security, trusted by thousands of enterprises across 100+ countries—including more than 60% of the world's 100 largest banks—to safeguard digital accounts, secure financial transactions, and prevent fraud. Our award-winning solutions provide passwordless authentication, digital transaction security, and advanced mobile application protection, helping organizations meet the highest security standards and global compliance requirements. As cyber threats grow more sophisticated, OneSpan delivers cutting-edge technology to safeguard customers, mitigate risks, and ensure trust in every digital interaction.
