

# Mobile Threat Intelligence

Know what's targeting your most widely used, fastest growing channels

Mobile channels are the criminal's favorite hangouts. Digital life has shifted to mobile, as has digital finance.

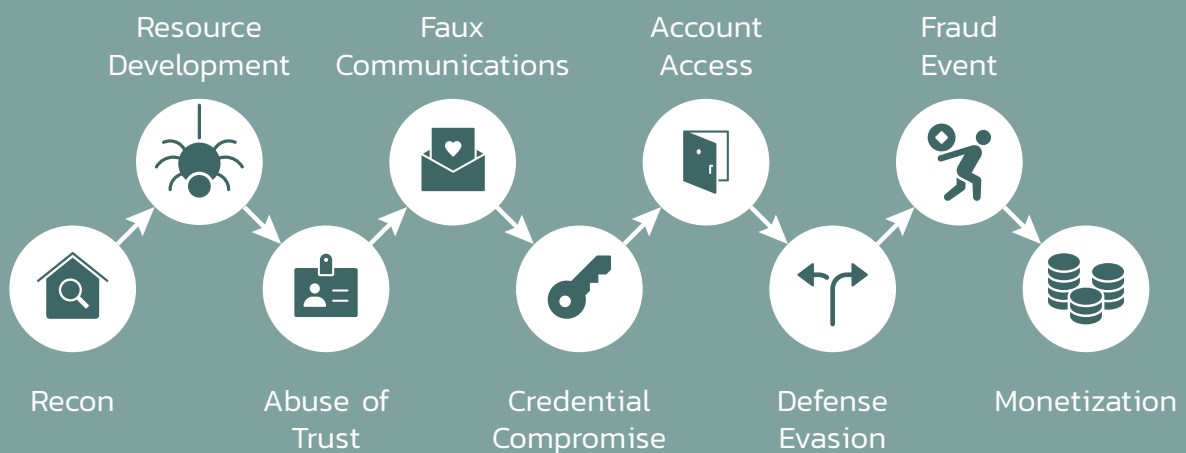

Mobile threats are increasing. They target financial institutions and their customers directly, and can evolve into utilizing other attack techniques.

The only way to deal with these mobile threats is by being proactive. Escaping the attack and response cycles is key.

ThreatFabric allows you to get the operational, tactical, and strategic advantage on your mobile channels. Mobile Threat Intelligence (MTI) keeps the amount of surprises to a minimum.

## The cyberfraud kill chain

ThreatFabric's Mobile Threat Intelligence provides teams with insights in all stages of the cyberfraud kill chain:

### Key value

**Strategic:** See trends and follow the global and local threat landscapes. Base your investments on data. Make investment decisions at the right time.

**Tactical:** Track campaigns, get attribution, make risk-informed decisions. Train your personnel and gain access to the world's biggest body of knowledge.

**Operational:** Get insights into attacks, IoCs, TTPs, and observables, and power your anti-fraud, security information and event management (SIEM), or threat intelligence platform (TIP).

# Why ThreatFabric?

ThreatFabric is the world leader in mobile threat intelligence. We track malware, campaigns, and observables and have named over 80% of known malware families. We have built the most comprehensive body of knowledge, and are proud of the reputation of being first whenever a new threat emerges.
