

DigipassONE™

Modernize authentication at your own pace

Every authentication method. Every deployment context. One platform.

Authentication is no longer a single technology decision. Financial institutions and other high-trust organizations must support multiple authentication methods while balancing evolving threats, changing user expectations, emerging identity ecosystems, and regulatory requirements—all while preserving existing authentication investments.

DigipassONE™ is OneSpan's unified authentication platform, bringing together authentication, transaction security, digital credentials, application protection, and analytics through a shared platform foundation.

Rather than forcing organizations to replace existing investments, DigipassONE enables a practical path to modernization, allowing organizations to adopt new capabilities such as passkeys, digital credentials, and advanced application protection as their needs evolve.

Modernize without disruption

Adopt passkeys, digital credentials, and emerging authentication technologies while supporting today's and tomorrow's authentication needs.

Simplify management

Reduce operational complexity through shared administration, policy management, reporting, and monitoring.

Strengthen security

Protect identities, strengthen authentication, and secure critical transactions through high-assurance authentication and transaction security.

Grow with your business

Start with the capabilities you need today and expand over time through a modular platform built to evolve with your business.

One platform. Four core capabilities.

DigipassONE brings together four integrated capabilities on a shared platform foundation, helping financial institutions support diverse customer authentication preferences while modernizing at their own pace.

DigipassONE Authenticate

Combines intelligent, risk-based authentication with one of the industry's broadest authentication portfolios to deliver secure, phishing-resistant login and transaction approval.

- Passkeys
- Hardware authenticators
- Software authenticators
- Transaction signing

DigipassONE Verify

Simplifies digital credential issuance and verification across wallet ecosystems, helping support digital identity initiatives, streamline onboarding processes, and establish trusted digital interactions.

- Digital credential issuance
- Credential verification
- Wallet ecosystems
- Trusted digital interactions

DigipassONE Protect

Secures mobile applications at runtime through continuous in-app protection, adaptive defenses, and real-time threat visibility.

- Continuous in-app protection
- Adaptive defenses
- Real-time threat visibility
- Sensitive transaction protection

DigipassONE Insights

Provides analytics, reporting, and visibility across platform capabilities, optimizing authentication strategies, improving decision-making, and helping measure the effectiveness of authentication investments.

- Analytics
- Reporting
- Platform visibility

Shared platform services

DigipassONE delivers a common platform foundation with shared administration, policy management, account management, auditing, compliance logging, and reporting—providing a consistent experience across all platform capabilities.
