

# eSignLive for Finastra LaserPro

Achieve End-To-End Digitization of Your Loan Origination Process With e-Signatures

**LaserPro provides an integrated and seamless way to reduce the preparation time needed for lenders to originate and process a commercial lending transaction. However, to keep the transaction moving smoothly, it is important that the financial institution can obtain legal and secure e-signatures from their borrowers without the hassle of downloading, signing and scanning.**

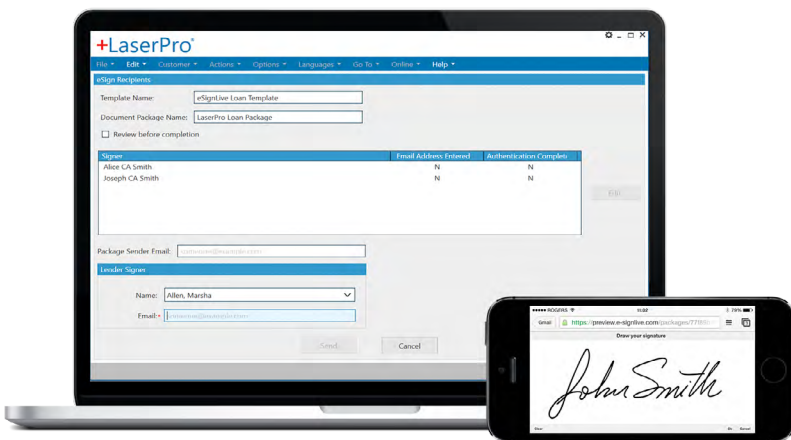

eSignLive for Finastra enables lenders to send loan origination documents to clients for e-signatures directly from LaserPro. This integrated solution streamlines and enhances the loan signing process for financial institutions by eliminating manual errors and reducing costs. With eSignLive's e-signature ceremony, borrowers can review and sign their loan documents from anywhere, anytime and on any device. By providing an end-to-end digital solution for loan origination, eSignLive for Finastra's LaserPro ensures that the lender and the signer, both have an effortless and intuitive user experience.

**eSignLive for Finastra LaserPro handles many different scenarios, including:**

- Managing multiple documents and signers with serial or parallel signing processes
- Choosing from various authentication options like Q&A, SMS or email
- Implementing built-in reminders and expiration dates
- Auto-sending documents once prepared and generated
- Customizing the signer experience across any channel and any device, including mobile

**Add e-signatures to all your loan origination documents like:**

- Notice of Final Agreement
- Promissory Notes
- Credit Disclosures
- Mortgage application
- Authorization Documents
- Closing Disclosures
- and more...

## Case Study

**Deliver & sign documents in real-time**

- Track the progress of your digital transaction in your eSignLive account
- Automatically archive e-signed documents in your eSignLive account for as long as you'd like
- Use and save templates to automate future transactions

- E-signed documents include embedded audit trails and tamper-evident signatures that record who signed, in what order, when and where

## THE SIGNING PROCESS

1

### SELECT

To send your documents for e-Signatures, select eSignLive as your eSign Export vendor and choose the eSign Authentication option in the Customer Details window.

2

### ADD AUTHENTICATION

Enter the Authentication details for each package signer, appropriate to your Financial Institution's needs.

3

### SEND

Pick the documents that you wish to send, enter the package details and send the package for your clients to e-sign - anywhere, any time and on any device.

4

### TRACK

Monitor and manage the progress of e-sign transactions in eSignLive and report on their status.

## Product Differentiators

### Most flexible solution

- Most deployment options: public cloud, private cloud or on-premises behind the firewall (for any project size, complexity or budget)
- Configurable workflows and a wide range of user authentication options and signature capture methods

### Highest adoption rates

- Fully white-label the e-sign process and deliver the best signer experience – from simple to the most complex workflows
- Ease of use across channels and devices from 25+ years of best practices

### Most comprehensive audit trails

- Static and patented visual audit trails make it easy to demonstrate compliance and prove exactly what was signed and how it was signed

### Secure, legal and compliant

- Tamper-evident seal for each signature
- One-click, vendor-independent verification of signatures
- eSignLive meets the highest security standards including SOC 2, FedRAMP and HIPAA
